

Worked for 14s

Yes. I checked the attached gameplay log directly and found **22 unique** `eventType` **values** across **4,467 total log records**. Every record contains a non-null `eventType`, so there were no missing event types in the file. `wenyi081326-1.stratalog.logdata`

#	Unique <code>eventType</code>	Number of records
1	<code>InputEvent</code>	1,615
2	<code>DialogueEvent</code>	1,347
3	<code>PlayerPositionEvent</code>	578
4	<code>PuzzlePieceVisibleEvent</code>	346
5	<code>argumentationNodeEvent</code>	154
6	<code>DaniEvent</code>	91
7	<code>ObjectInterEvent</code>	59
8	<code>questEvent</code>	56
9	<code>chatEvent</code>	32
10	<code>gameWindowUnfocusEvent</code>	31
11	<code>TopographicMapEvent</code>	31
12	<code>gameWindowFocusEvent</code>	29
13	<code>Soil Key Puzzle</code>	26
14	<code>WaterChamberEvent</code>	21
15	<code>argumentationToolEvent</code>	14
16	<code>argumentationEvent</code>	12
17	<code>TerasGardenBox</code>	6
18	<code>argumentationAnswerEvent</code>	5
19	<code>gameStartEvent</code>	5

#	Unique eventType	Number of records
20	soilMachine	5
21	EndOfUnit	2
22	DEBUGMenu	2

So, in simple list form, the unique event types are:

```

InputEvent
DialogueEvent
PlayerPositionEvent
PuzzlePieceVisibleEvent
argumentationNodeEvent
DaniEvent
ObjectInterEvent
questEvent
chatEvent
gameWindowUnfocusEvent
TopographicMapEvent
gameWindowFocusEvent
Soil Key Puzzle
WaterChamberEvent
argumentationToolEvent
argumentationEvent
TerasGardenBox
argumentationAnswerEvent
gameStartEvent
soilMachine
EndOfUnit
DEBUGMenu

```

These names preserve the **exact capitalization and spacing used in the attached document**; I have not renamed or normalized them.
